

A Cataract 'Center of Excellence'

Welcome to the Cataract & Lasik Center of Utah, which has a tradition of eye care excellence for more than 3 decades. We have prepared this packet to help you make a more informed decision about not only improving your vision through cataract surgery...but also enhancing your lifestyle.

You have chosen a team of eye care professionals who are specially trained in the latest advances in cataract care, including the new laser method of cataract removal. That is why doctors and patients across the Intermountain West choose the Cataract & Lasik Center of Utah for their cataract care.

In addition to our history and experience in the region, we also offer cataract patients the safest, most affordable method of cataract surgery available today. By performing your cataract procedure in our Ambulatory Surgery Center, we are able to save you, Medicare, and your insurance company substantial costs when compared to hospital-based cataract surgery.

Another advantage of having your cataract procedure performed at the Cataract & Lasik Center of Utah is access to the latest breakthroughs in Intraocular Lens (IOL) designs used in cataract surgery. Cataract patients can choose to enhance their vision with a number of exciting new lens implants we offer, including options to treat your astigmatism and reduce your need for glasses. Although these options will be discussed with you in more detail at your appointment prior to scheduling your procedure, please look online at lasikutah.com, cataractutah.com or lasikutahcounty.com to learn more.

Please help us achieve the best possible vision for you by reading the enclosed insert and by completing our Vision & Lifestyle Survey. Having cataract surgery is one of the most important and life-changing decisions you will make. Our goals are to make sure you fully understand your options and help you to enjoy a lifetime of the best possible vision following your cataract procedure.

So that we can best prepare for your upcoming appointment, please fill out the enclosed patient information forms and return them to our office in the attached stamped envelope within 72 hours. It is important that we receive this information prior to your appointment. Otherwise we may have to reschedule your appointment.

We also offer online access to these forms through a private patient portal. Through this portal, you can complete forms and update your contact information. With no printing necessary, patients are enjoying the ease of filling out their forms online. If you would like your own personal password, please call our office at: 801-224-6767, or email us at stacey@lasikutah.com.

If there is not enough time before your appointment to mail these forms to us, and the patient portal is not an option, please call our office and we will be happy to assist you.

Thank you for trusting us with one of God's most precious gifts, your vision.

Jamie M. Monroe, MD
